Basic Right Masthead

Main content flows to the left of the masthead. The masthead extends the full height of the column, creating a sidebar effect that's common in magazine and newsletter layouts.

Additional paragraphs continue to flow alongside the masthead until the content ends or a new page begins.

This document demonstrates how to use the masthead element to create a table of contents sidebar. The masthead runs the full height of the content area, providing a persistent navigation reference.

The main text flows naturally around the masthead, making efficient use of the page width while keeping important reference material visible.
