Basic Left Wrap

Sidebar

Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur. Excepteur sint occaecat cupidatat non proident.

Wrap with Clearance

Notice the larger gap between this text and the wrapped box. The clearance parameter controls the spacing between wrapped content and flowing text.

20pt gap

Multiple Wraps (Both Sides)

Left

Text flows between two wrapped elements. This creates a narrow column of text in the middle. Useful for creating interesting layouts with content on both sides.

Right

Wrap with Figure

Figures can be wrapped too, complete with captions. The caption flows naturally with the figure content and text wraps around the entire figure block.

"Design is not just what it looks like. Design is how it works." — Steve Jobs

Info Box

Note

This is an info box with important details that readers should notice.

Main content continues here with the info box displayed to the left. This pattern is useful for callouts, warnings, tips, or any supplementary information that should stand out but not interrupt the flow.

Sequential Wraps

First paragraph wraps around the first box.

Second paragraph wraps around the second box. Each wrap element affects content that follows it.

1

2

Third paragraph with its own wrap. This creates a staggered layout effect.
